

Introduction

.Purpose of the project: Our main purpose in this is to provide coding related knowledge to the users and also to provide a platform where coders connect with each other.

.Scope: In this project we use mainly use MERN stack and also to store images we use clouldinary cloud service.

.Problem in existing system: In the existing system, A person can get knowledge about coding but He/She is unable to connect with Coders or we can say that in existing system there is no platform for coders.

.Statement of problem: To provide knowledge about coding as well as a platform which connects coders.
